Synergy among Breast Units

St. Agatha Breast Centre ProCare - Podkonice, Slovakia

General Information

New breast cancer cases treated per year 426

Breast multidisciplinarity team members 19 Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

Clinical Director: Ivan Turcan, MD

Since November 2009, a multidisciplinary breast unit has been operating in Banska Bystrica. It is the first facility of this kind in the Slovak Republic. The core team works based on interdisciplinary cooperation to create an individual treatment plan for each patient. On average, 260 cases are treated for breast cancer yearly. The breast unit performs all the diagnostic steps, including vacuum-assisted biopsy under stereotactic control. Surgical treatment includes oncoplastic surgery, WGL, ROLL and SNOLL procedures for pre-operative non-palpable lesions localisation. When mastectomy is indicated, we offer skin-sparing mastectomy or nipple-sparing mastectomy with immediate reconstruction (indicated cases). Axillary staging is performed with Sentinel Lymph Node Biopsy. The complex therapy includes pre-operative and adjuvant systemic treatment, radiotherapy, locally advanced and metastatic breast cancer treatment, and rehabilitative and psychological support.

Breast Surgery

☑ New operated cases per year (benign and malignant)	686
Z Dedicated Breast Surgeons	5
Surgeons with more than 50 surgeries per year	3
☑ Breast Surgery beds	10
🗹 Breast Nurse specialists	4
☑ Outpatient surgery	
Intra-operative evaluation of sentinel node	
Reconstruction performed by Breast Surgeons	

Clinical Research

Primary technique for staging the axilla

- Axillary lymph node dissection
- Sentinel lymph node biopsy:
- Blue dye technique
- Radio-tracer technique
- V Blue dye + Radio-tracer
- Axillary sampling

Reconstructive/Plastic surgeons 1 Immediate Reconstruction available Type of breast reconstructive surgery available Remodelling after breast-conserving surgery Remodelling after breast-conserving surgery Reconstruction after mastectomy: Two-stage reconstruction (tissue expander followed by implant) One-stage reconstruction Autogenous tissue flap Transverse rectus abdominis (TRAM) Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.)

Surgery on the contralateral breast for symmetry

Pathology

Dedicated Breast Pathologists	3	Other special studies available
Available studies		✓ Fluorescence in-situ Hybridization for HER-2 gene (FISH)
🗹 Cytology		Oncotype Dx (21-gene assay)
🗹 Haematoxylin & eosin section (H&E)		MammaPrint (70-gene microarray)
🗹 Surgical specimen		\Box Prediction Analysis of Microarray 50-gene set (PAM 50)
Sentinel node	Parameters included in the final pathology report	
Core biopsy		
Frozen section (FS)		Pathology stage (pT and pN)
Surgical specimen		Tumour size (invasive component in mm)
Sentinel node		🗹 Histologic type
🗹 Immunohistochemistry stain (IHC)		🗹 Tumor grade
Strogen receptors		🗹 ER/PR receptor status
Progesterone receptors		🗹 HER-2/neu receptor status
V HER-2		Peritumoural/Lymphovascular invasion
✓ Ki-67		🗹 Margin status
		☑ Ki-67. TILS, AR

Medical Oncology

V Dedicated Breast Medical Oncologists	3
V Outpatient systemic therapy	
🗹 Clinical Research	

Radiotherapy

Dedicated Radiation Oncologists

Clinical Research

Available techniques after breast-conserving surgery (including experimental)

Whole-Breast RT (WBRT)

- Partial breast irradiation (PBI):
- External beam PBI
- Interstitial brachytherapy

Targeted brachytherapy (MammoSite, SAVI applicator, other devices)

□ Intra-operative RT (IORT)

Multidisciplinary Meeting (MDM) / Tumour Board (TB)

Regular MDM/TB for case management discussion	Specialties/services participating in MDM/TB
Twice a week	🗹 Radiology
🗹 Weekly	Margery
Every two weeks	Reconstructive/Plastic Surgery
Other Schedule	M Pathology
Cases discussed at MDM/TB	Medical Oncology
	Madiotherapy
Preoperative casesPostoperative cases	Genetic Counselling
	Marcast Nurse Service
	Psycho-oncology

Further Services and Facilities

Nuclear Medicine

V Lymphoscintigraphy

- 🗹 Bone scan
- Positron Emission Tomography (PET)
- V PET/CT scan

Rehabilitation

- V Prosthesis service
- V Physiotherapy
- V Lymph-oedema treatment

Genetic Counselling

Specialist Providing Genetic Counselling/Risk assessment service:

- Dedicated Clinical Geneticist
- Medical Oncologist
- 🗹 Breast Surgeon
- General Surgeon
- Gynaecologist
- Genetic Testing available
- Surveillance program for high-risk women

Data Management

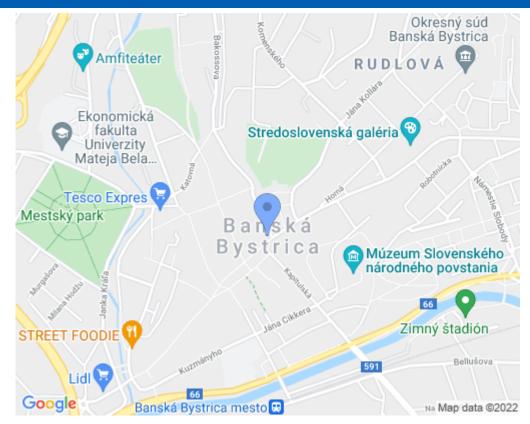

- ☑ Database used for clinical information
- 🗹 Data manager available
