Synergy among Breast Units

Mater Salutis Hospital AULSS 9 of the Veneto Region - Legnago, Italy

General Information

Image: Mater Salutis Hospital AULSS 9 of the Veneto Region

New breast cancer cases treated per year

Breast multidisciplinarity team members
Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

Clinical Director: Andrea Bonetti, BA, MD

Our Breast Unit fulfills all the requirements proposed by EUSOMA and was certified by Italcert on May 19th 2017 (EUSOMA certified Breast Unit 1030/00). When we started the procedures for the certification, our Health Maintenance Organization (HMO), legal site Legnago (Verona), was in charge of the health of only one hundred fifty thousand residents and could count only on one hospital, the Mater Salutis Hospital in Legnago (a four hundred beds hospital with all the medical and surgical specialties, including a Department of Medical and Radiation Oncology). Later, Veneto Region Authorities re-shaped the borders of all HMO of the Region and now the entire province of Verona, with around one million residents, is covered by just one HMO. We are now working to include the teams dedicated to breast cancer operating in the other two hospitals of the area as certified satellite sites of our Breast Unit. Our aim is to take care of about three hundred new cases per year (during the past years the number of cases treated only at the Legnago Hospital was just above one hundred fifty per year).

CERTIFICATION(S) ACCREDITATION(S)

BCCERT - Breast Centres Certification

Expiration date: 18 May 2020

This Centre has notified to be certified and, as such, been requested to upload the certification document for further information. When the certification document/s is/are provided, it is/they are made available hereafter.

Available services

✓ Radiology

✓ Breast Surgery

☑ Reconstructive/Plastic Surgery

✓ Pathology

Medical Oncology

✓ Radiotherapy

✓ Nuclear Medicine

☑ Rehabilitation

✓ Genetic Counselling

✓ Data Management

✓ Psycho-oncology

✓ Breast Nurses

Social Workers

✓ Nutritional Counselling

✓ Survivorship Groups

Sexual Health Counselling

✓ Supportive and Palliative Care

☐ Integrative Medicine

Radiology

☑ Dedicated Radiologists	3
✓ Mammograms per year	15000
✓ Breast	
radiographers	
Screening program	
✓ Verification for	
non-palpable breast lesions	
on specimen	
Axillary US/US-guided	
FNAB	
☑ Clinical Research	

Available imaging equipment **Mammography** ✓ Ultrasound ✓ Magnetic Resonance Imaging (MRI) Available work-up imaging equipment ✓ Computer Tomography ✓ Ultrasound ✓ Magnetic Resonance Imaging (MRI) ☐ PET/CT scan ✓ Bone scan Primary technique for localizing non-palpable lesions ✓ Hook-wire (or needle localization) ☐ Charcoal marking/tattooing ROLL: radio-guided occult lesion localization

Available breast tissue sampling equipment
✓ Stereotactic Biopsy (Mammography guided)
☑ Core Biopsy (Tru-cut)
☑ Vacuum assisted biopsy
☑ Ultrasound-guided biopsy
Fine-needle aspiration biopsy (FNAB, cytology)
☑ Core Biopsy
☑ Vacuum assisted biopsy
☐ MRI-guided biopsy
Core Biopsy
☐ Vacuum assisted biopsy

Breast Surgery

✓ New operated cases per year (benign and malignant)	180
✓ Dedicated Breast Surgeons	2
☑ Surgeons with more than 50 surgeries per year	2
✓ Breast Surgery beds	6
✓ Breast Nurse specialists	2
☑ Outpatient surgery	
✓ Intra-operative evaluation of sentinel node	
☐ Reconstruction performed by Breast Surgeons	
☑ Clinical Research	

Axillary lymph node dissection ✓ Sentinel lymph node biopsy: □ Blue dye technique ✓ Radio-tracer technique □ Blue dye + Radio-tracer

Primary technique for staging the axilla

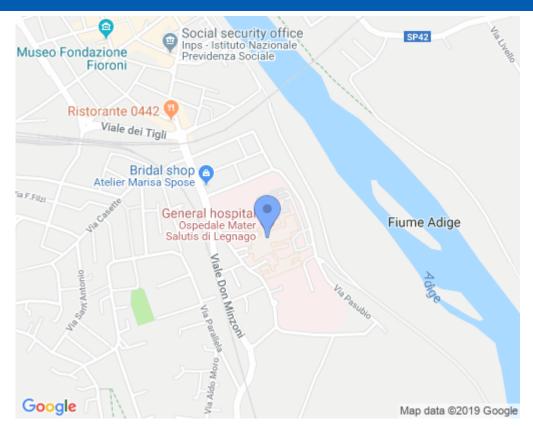

■ Axillary sampling

econstructive/Plastic Surgery	
☑ Reconstructive/Plastic surgeons	Type of breast reconstructive surgery available
☑ Immediate Reconstruction available	
	Remodelling after breast-conserving surgery
	Reconstruction after mastectomy:
	$oldsymbol{arprime}$ Two-stage reconstruction (tissue expander followed by implant)
	☑ One-stage reconstruction
	☑ Autogenous tissue flap
	☑ Latissimus dorsi flap
	☐ Transverse rectus abdominis (TRAM)
	\square Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.)
	$ lap{\hspace{-0.1cm} \ }$ Surgery on the contralateral breast for symmetry
athology	
✓ Dedicated Breast Pathologists	Other special studies available
Available studies	☑ Fluorescence in-situ Hybridization for HER-2 gene (FISH
✓ Cytology	Oncotype Dx (21-gene assay)
✓ Haematoxylin & eosin section (H&E)	☐ MammaPrint (70-gene microarray)
☑ Surgical specimen	☐ Prediction Analysis of Microarray 50-gene set (PAM 50)
✓ Sentinel node	
☑ Core biopsy	Parameters included in the final pathology report
✓ Frozen section (FS)	✓ Pathology stage (pT and pN)
✓ Surgical specimen	☑ Tumour size (invasive component in mm)
✓ Sentinel node	☑ Histologic type
✓ Immunohistochemistry stain (IHC)	☑ Tumor grade
✓ Immunonistochemistry stain (IHC) ✓ Estrogen receptors	☑ ER/PR receptor status
✓ Progesterone receptors	☑ HER-2/neu receptor status
₩ HER-2	✓ Peritumoural/Lymphovascular invasion
₩ Ki-67	✓ Margin status
E N O	-
ledical Oncology	
☑ Dedicated Breast Medical Oncologists 3	
✓ Outpatient systemic therapy	
☑ Clinical Research	

Radiotherapy	
☑ Dedicated Radiation Oncologists	
☑ Clinical Research	 Available techniques after breast-conserving surgery (including experimental)
	☑ Whole-Breast RT (WBRT)
	Partial breast irradiation (PBI):
	External beam PBI
	☐ Interstitial brachytherapy
	\square Targeted brachytherapy (MammoSite, SAVI applicator, other devices)
	☐ Intra-operative RT (IORT)
Multidisciplinary Meeting (MDM) / Tumour Board ((ТВ)
Regular MDM/TB for case management discussion	Specialties/services participating in MDM/TB
☐ Twice a week	✓ Radiology
✓ Weekly	✓ Breast Surgery
Every two weeks	✓ Reconstructive/Plastic Surgery
Other Schedule	✓ Pathology
Cases discussed at MDM/TB	☑ Medical Oncology
	☑ Radiotherapy
✓ Preoperative cases	☐ Genetic Counselling
Postoperative cases	☑ Breast Nurse Service
	☑ Psycho-oncology
urther Services and Facilities	
Nuclear Medicine	Genetic Counselling
✓ Lymphoscintigraphy	✓Specialist Providing Genetic Counselling/Risk assessment
☑ Bone scan	service: Dedicated Clinical Geneticist
Positron Emission Tomography (PET)	Medical Oncologist
PET/CT scan	□ Breast Surgeon
Rehabilitation	General Surgeon
	Gynaecologist
✓ Prosthesis service	, ,
M Physiotherapy	✓ Genetic Testing available✓ Surveillance program for high-risk women
☑ Lymph-oedema treatment	Data Management
	✓ Database used for clinical information
	✓ Data manager available
